User Interface Design Document

1. Introduction

The User Interface (UI) Design Document provides a detailed visual and interactive description of the SmartSpend AI smart spending management system. It acts as a reference point for designers, developers, testers, and project stakeholders by outlining the structure, flow, and functionality of the user interface prior to implementation. This document facilitates clear communication of design expectations and helps ensure the final product aligns with user needs.

1.1 Purpose

The purpose of this document is to define and illustrate the user interface of the SmartSpend AI application. It aims to establish a shared understanding of how users will interact with the system, including screen layouts, user flows, and interface behaviors. This document supports design validation, guides frontend development, and serves as a basis for usability testing.

1.2 Scope

This document covers the user-facing interfaces of the SmartSpend AI. It focuses on the overall user experience, key interaction flows, and interface components relevant to typical user tasks. Administrative tools, backend systems, and non-visual technical elements are outside the scope of this document.

1.3 Overview

The document is divided into main sections:

- **Introduction:** An overview of the document's purpose and scope.
- **User Interface:** Detailed navigation diagrams, design images (screen prototypes), descriptions of the purpose, display, and interaction methods for each screen. For the core screens (Main Dashboard & Manage Monthly Budget), two design options are provided.

1.4 About Figma Prototype

The user interface designs in this document were created using Figma, a cloud-based design and collaboration tool. Figma allows designers and stakeholders to view, comment, and interact with UI prototypes in real time, ensuring seamless communication and faster design iteration.

Link to "SmartSpend AI" Figma prototype:

<https://www.figma.com/design/PSxzq8CUG0FdZq5cK62PL1/SmartSpend-AI?node-id=0-1&t=PGVvrNssBL0Xk500-1>

Due to the limitations of Figma's prototyping capabilities, the interface shown may not fully reflect the behavior or appearance of the final software.

2. User Interface

The primary UI design uses a dominant color scheme of Emerald Green combined with White/Light Gray, creating a sense of security, transparency, and alignment with the financial/money management theme.

2.1 Navigation Flow

When a user opens the app, the overall navigation flow is as follows:

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID_01	

This diagram illustrates the simplified version of the user interface, where important navigations are shown.

2.2 Main Dashboard

The home screen (Main Dashboard) serves as a financial information hub, allowing users to quickly access their total balance, total income/expenses for the month, overview charts, and a list of 5 recent transactions.

Option 1:

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID 01	

- **Purpose:** Displays an overall financial picture for the current month and provides quick access to core features.
- **What it shows:**
 - **Header:** Personalized greetings along with notification icons.
 - **Balance Card:** Displays the available balance (e.g. VND 3,730,000), total income, and total expenses for the month in green cards.
 - **Spending overview:** The Donut chart shows spending rates by categories in month.
 - **Day/Week Selection Bar:** Allows for quick viewing of transactions by day of the week.
 - **Recent Transactions:** A list of the 5 most recent income/expenses with category icons, transaction names, and corresponding amounts (+/- VND).
 - **Bottom Navigation Bar:** 5 icons including Home, Transaction History, Add Transaction (+) button, Budget, and Personal Profile.
- **How users can use it:**
 - Tap the floating (+) button in the middle of the navigation bar to select additional transactions manually or scan invoices with the AI Scanner.
 - Tap transaction items in the list to view/edit details.
 - Switch tabs in the Bottom Bar to access other function screens.

Option 2:

This option offers a slightly different interface compared to option 1. However, the functionality remains the same.

UI Design	Date: 25/07/2026
SS UID 01	

2.3 Add Manual Transaction

- **Purpose:** Allows users to manually enter income or expense transaction information without using the automatic receipt scanning feature.
- **What it shows:**
 - **Transaction type toggle button:** Selects two modes: Expense or Income.
 - **Amount input field:** A field to enter the transaction amount in VND.
 - **Dropdown select category:** A list of categories to choose from (Food, Transportation, Shopping, etc.).
 - **Date & Time:** A field to select the transaction date and time.
 - **Note field:** A field for users to add details about the transaction.
 - **Action buttons:** A "Scan AI receipt" button to switch to the AI scanner and a "Save" button to record the data.
- **How users can use it:**
 - Users select the transaction type (Income or Expense), then enter the actual amount.
 - Select the appropriate category from the dropdown list and adjust the date and time if necessary.
 - Enter any additional notes (if applicable) and click the "Save" button so the system can record the transaction in the database and update your wallet balance.

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID_01	

2.4 Add Transaction via AI Scanner

- Purpose:** To help users quickly record spending transactions by taking a picture of the receipt or uploading an existing image, the system will use OCR/AI technology to automatically extract data.
- What it shows:**
 - Receipt Scanning Screen (Camera Viewfinder):** A fluorescent green frame for aligning the receipt, an icon to upload images from the Gallery in the left corner, and a large circular Capture button in the center.
 - Results Screen:**
 - A message indicating successful recognition.
 - A thumbnail of the scanned receipt.
 - Extracted information fields: Store/Transaction Name, Amount, Transaction Type, AI-suggested Category, Date and Time.
 - "Back" and "Save" buttons.
- How users can use it:**
 - Users place the receipt in the capture frame and press the Capture button, or select the Gallery icon to upload the receipt image from their device.
 - The image processing system automatically fills in the information on the confirmation form.
 - Users review the extracted information on the results screen and can directly tap on the information fields to edit if the AI recognition is inaccurate.
 - Press the "Save" button to save the transaction to the spending list.

2.5 View Transaction History

Option 1:

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID 01	

- **Purpose:** Displays a list of all recorded financial transactions in chronological order, supporting users in searching, retrieving, and filtering income and expenditure data.
- **What it shows:**
 - **Search Bar:** Keyword input box at the top of the screen to search by store name or note.
 - **Category Filter Chips:** Horizontal quick-access buttons to filter transactions by category (Eating, Transportation, Shopping, etc.).
 - **Transaction Ledger:** Groups the list by day; each item displays a category icon, transaction name, time, and amount (red for expenses, green for income).
- **How users can use it:**
 - Users swipe the list to review past income and expenses.
 - Type keywords into the search bar or tap category chips to view transactions that meet the criteria.
 - Tap a specific transaction item to view details, edit, or delete the transaction from the system.

Option 2:

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID 01	

This option offers a slightly different interface compared to option 1. However, the functionality remains the same.

SS UID 01	

2.6 Set Monthly Budget

Option 1:

- **Purpose:** Helps users set, track, and manage spending limits for the overall budget and individual categories for the month, and alerts when spending is about to exceed the limit.
- **What it shows:**
 - **Total budget:** The tab displays the total spending limit allowed for the month.
 - **Income by category:** A list of expected or achieved income for the month.
 - **Spending limit by category:** A list of categories with a progress bar, clearly showing the amount spent/set limit and the corresponding percentage.
- **How users can use it:**
 - Click the "(+) Add" icon or the edit icon to set the maximum spending limit for each category.
 - Monitor the color change of the progress bar to proactively adjust spending habits before exceeding the budget.

Option 2:

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID 01	

This option offers a slightly different interface compared to option 1. However, the functionality remains the same.

SS UID 01	

2.7 Registration & Get User Profile

- **Purpose:** Allows new users to create an account, verify their email via OTP code, and complete their initial personal profile information.
- **What it shows:**
 - **Registration screen:** Fields for Full Name, Email, Password, a "Register" button, and the "Continue with Google" option.
 - **Enter OTP code screen:** Six squares for entering the OTP verification code sent to your email and a "Execute/Continue" button.
 - **Get User Profile screen:** A form to fill in additional information including Full Name, Email, Date of Birth, Occupation, Income, and an "Update" button.
- **How users can use it:**
 - Enter your full Email and Password and click "Register" (or choose "Sign in with Google").
 - Open your email to retrieve the 6-digit OTP code, return to the application, and enter the code to verify.
 - Complete the initial information (Full Name, Date of Birth, Occupation, Income) and click "Update" to complete registration and return to the main screen.

SmartSpend AI	Version: 1.0
UI Design	Date: 25/07/2026
SS UID 01	

2.8 Login & Forgot Password / Reset Password

- **Purpose:** Provides an authentication method for users to log into the application or recover access when they forget their password.
- **What it shows:**
 - **Login screen:** Email and password input fields, a "Login" button, a "Forgot password?" link, and a "Login via Google" button.
 - **Recovery Email input screen:** Registered email input field and a "Send OTP" button.
 - **Enter OTP code screen:** Six squares for entering the OTP verification code sent to your email and a "Execute/Continue" button.
 - **Reset Password screen:** "New password" input fields, "Confirm password," and a "Confirm" button.
- **How users can use it:**
 - Enter your email/password and press "Login" to access your account.
 - If you forget your password, press the "Forgot password?" button, enter the email address to receive the OTP verification code, and then enter your new password on the "Reset Password" screen.
